

LADIES SHOE CONVERTERS

MARIANNE'S

CLAIM

My claim consists of an improvement in ladies' shoes. I claim a new idea to convert a basic ladies' shoe by interchanging the top front panel/slide of the shoe with other slides in various materials in any heel height.

A space saver for packing/suitcase and closet/storage space; also an economic factor. The basic shoe can be converted to many and replace and alter appearances with minimal effort, thus eliminating the need to purchase shoes for every occasion. The look will be considerably changed to blend with daytime or evening wear.
